## CURRICULUM VITAE

## Bio

I am 27 years old, in April this year I graduated in **Communication Design at the Politecnico di Milano**. It has been the culmination of a varied course of study that has included a three-year degree in **Architecture** at the Politecnico di Torino and a one-year course in **Web Design**. All these experiences included a period of internship in a company.

This path therefore led me to leave my hometown, Turin, to move to Milan, an extraordinarily complex and stimulating city in which I have lived for about 4 years now. I love football, cooking, clubs with warm outdoor lights and music.

Finally I discovered that I am passionate about graphics, and this makes me work without excessive stress and heaviness. What was the saying? "Choose the job you love and you will never have to work a day in your entire life." Here is not literally, but roughly I agree with it.
