Giorgio Ventura

CURRICULUM VITAE

Bio

I am 25 years old, I was born in Torino and I graduated in December 2017 in **Architecture** at Politecnico. After that, I studied Web Design and I worked in the field of graphic communication for the Turin company "**ComunicoGroup**". This experience made me develop the idea that I wanted to work in the world of communication so I decided to deepen my studies in this area to do it better. For this reason, I started my master's degree in "***DESIGN DELLA COMUNICAZIONE***" at the Politecnico in Milan. My biggest passions are **graphics** and **music** (I play guitar, I sing in a band that composes unreleased songs and I live constantly with Spotify).
